- American system of judging
- The quality desired in agricultural and horticultural product exhibits is the quality that brings the best financial return in the commercial market, and such exhibits must be at least equal in maturity, as that state of ripeness in order to be considered for premium awards.
- Mature: having reached the stage of ripeness which will ensure the completion of the ripening process to a degree which will insure palatability, after the removal of the product from the tree, plant or vine.
- Overripe: having an advanced state or maturity which causes the product to be undesirable for human consumption in a fresh state.
- The Inter-Mountain Fair staff has the right to disqualify, dispose or remove any entries that are overripe or entries that present insects or that have been exposed to insects that might otherwise harm crops at home.
- All vegetables must be grown locally in surrounded counties, no out of state produce.
- Unless otherwise stated, the type of vegetable desired for exhibit will be uniform commercial grade rather than over-grown.
